Design co-ordinated family of amenity luminaires comprising post top and wall bracket mounted lanterns and decorative columns

Design: Christian Hvidt

- Lantern design minimises the spread of light above the horizontal
- Choice of opal or clear conical shaped bowl
- Clear diffuser is enhanced by a luminous frosted band to limit glare and enhance performance
- Control gear integral within lantern canopy.
- Columns available for rooted or flange plate mounting

Moseley Square, Glenelg, SA

Wall bracket lantern

Materials/Finish

Lantern body, canopy and wall flange: aluminium, powder coated anthracite, textured.

Wall bracket: cast aluminium and galvanised steel, finished anthracite, textured.

Lantern bowl: opal or clear (with sandblasted frosted ring) polycarbonate.

Column: extruded and cast aluminium, powder-coated anthracite.

Installation/Mounting

Lanterns recommended mounting height 3-4m.

Post-top lantern: Integral control gear in canopy. Avenue F 700 - suitable for Ø60mm x 100mm long spigot.

Wall lantern: Mounts directly to wall via two Ø10mm holes at 120mm centres. 5 way terminal block for 6mm² conductors.

Looping possible. Integral control gear in lantern canopy. Columns: Root or flange plate mounted. Fixes via four Ø20mm holes at 160mm centres.

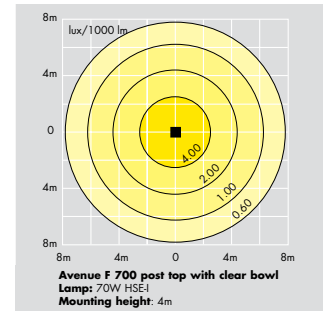

Specification

To specify lanterns state: Aluminium bodied conical lantern for post top/wall mounting/ with opal/clear bowl, finished textured anthracite employing 70W HSE-I/ 42W TC-TEL/ 100W HIE lamp.

As Thorn Avenue F.

To specify columns state: 2.9m/2.1m aluminium with 4 parallel square rods/cross profile. Supplied for root/flange mounting.

As Thorn Avenue F700/F500 column.

Ordering Guide Lamps to be ordered separately.
