

# Halogen Heaters

Ruby red infrared	1500W
AS/NZS 60598	Ⓢ Class I Electrical

Halogen Heaters create directed heat efficiently in one fitting suited to warehouse and factory environments

Ordinary heaters work mainly by convection or conduction – they heat the air which then heats you. In large areas that are only used occasionally, or continually open to the outside air, such methods are slow, wasteful and expensive.

Suitable for indoor, commercial, industrial and institutional applications such as, gymnasiums, sport halls, churches, community centres, factory canteens, classrooms, libraries, shops, restaurants, change rooms, shopping centre public areas, loading bays, warehouses, aircraft hanger garages and workshops.

- Highly efficient and economical
- Instantaneous ON/OFF
- No wasted heat
- Controllable
- Easy to install and use
- Small cross section
- Directional and functional
- Trunnion bracket fixing
- Wall mounting
- Ease of lamp access
- Normal (N) and wide (W) beam
- Single (1x) and twin (2x) ruby red lamp units.

## Materials/Finish

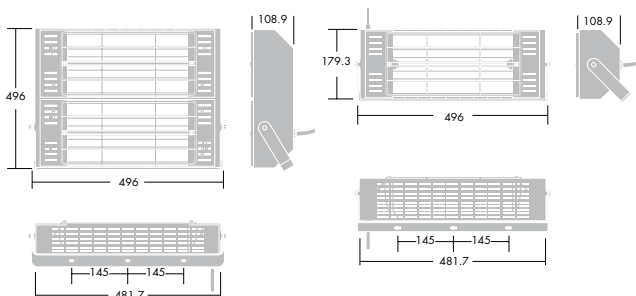

Body: vented steel, white paint finish.  
Reflector: High purity profiled aluminium.  
Trunnion bracket: white painted aluminium.  
Wire guard: plated aluminium.

## Installation/Mounting

Designed for hard wired permanent installation. Suitable for wall/surface trunnion bracket mounting. Optional wall bracket accessory for increased directional control. Three mounting holes in trunnion bracket: 1 centre Ø10mm and 2 either side Ø6.4mm. 1500W side holes 290mm centres.

## Specification

To specify state: Highly efficient and economical small sectioned Halogen heaters with normal and wide beam options for single and twin 1500W ruby red lamp units for wall mounting. As Thorn Halogen Heaters.

## Ordering Guide

Supplied complete with lamps.
