AH: Air Handling

### Instructions for Installation and Operation

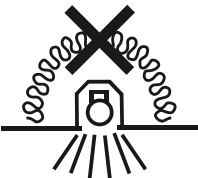

1. Installation and commissioning may only be carried out by authorised specialists and wired per the latest IEE Electrical Regulations or the National Standards.
2. Mains power must be switched off before carrying out the installation.
3. The manufacturer shall not be liable for any damage resulting from inappropriate modifications to the luminaire or faulty installation.
4. Indoor use only.
5. Caution, risk of electrical shock. The control gear provides basic insulation between the LV supply and the control circuit.
6. Luminaire not suitable for covering with thermally insulating material.

You can help protect the environment!

Please remember to respect the local regulations: hand in non-working electrical equipment to an appropriate waste disposal centre. The packaging material is recyclable. Please dispose of the packaging in an environmentally friendly manner and make it available for the recyclable material collection service.

**WARNING – The luminaire cannot be covered with thermal insulation mating or similar material**

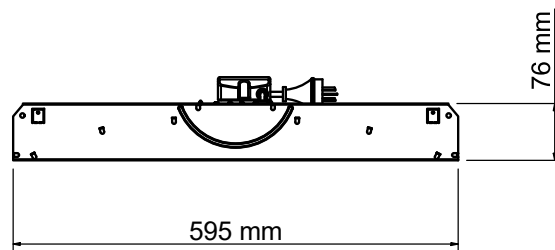

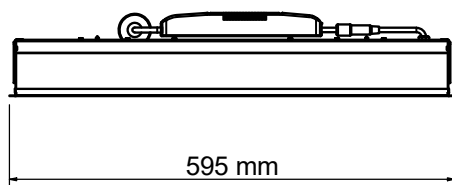

**WARNING – The luminaire is unsuitable for installation in locations with thermal insulation. Or may responsibility be expected to be installed in future, or where there is a likelihood of other combustible material, e.g. leaves or vermin debris, etc. collecting on or around the luminaire. It is not suitable for domestic installation or installation in residential areas of non-domestic installations (residential installation, hotels, boarding houses, hospitals, accommodation houses, motels, hostels and the like)**

**WARNING – Risk of overheating or fire if the clearance distances are compromised**
